Define Requirements

We offer added value through experience!

Your customers benefit from **user-friendly software** in all components. We pay attention to a **stable** and **effective** architecture for computer applications and apps during development.

The **core components** of the software design are **always maintained** - they can be **adapted at any time** with the changing requirements. Through **qualitative** system architecture in **cloud** and **on-premise environments**, we always pay attention to **cost efficiency**.

EGOMIND

Our guideline

There are numerous great products which are outstanding in your field and do exactly what the customer wants.

There is much more to a successful product than its core functionality. Customers benefit from the following principles:

Modern & intuitive	**M**	**anagememt**
Automated & understandable	**A**	**nalyzes**
Continuous & holistic	**S**	**ecurity**
Easy & efficient	**C**	**onnectivity**
Constant & automated	**O**	**ptimization**

Management
Whether installed from the cloud or locally, the product must be easy to install and very simple to administer. Enterprise and cloud solutions must be multi-tenant (MSP-readiness).

Analyze
It is important in almost all areas to understand what happens in the system itself and with the system, how it is used and why. This should be presented both in detail and graphically - preferably automatically and in a management-oriented way.

Connect
In most cases, the usefulness of the systems can grow exponentially if they can be connected to the other systems and these systems can exchange data and commands. For this, external APIs or other mechanisms to realize the connectors.

Security
A system in itself must be protected from external attacks. In addition, connections to other components such as the server, database, agents and consoles should be encrypted and secure.

Multifactor authentication is often requested by customers.

Optimization
Often this task is neglected, but with modern methods such as AI, you can dramatically increase the usefulness of the system and reduce effort.

Why EgoMind?

Our team has more than 15 years of experience. We have our own success stories with more than 2,500 customers and customer sizes ranging from 5 - 200,000 clients.

We offer a scalable business model. You get new products and innovations faster.
A fair and success-oriented cooperation is important to us.

Secure 4-C

Our task force for successful products

Control

EgoMind knows about implementations of easy-to-use and multi-client management interfaces. No matter if on-premise or cloud-based!

Connectivity

With a secure connectivity in all directions, the benefits of the systems can grow exponentially.

Collaborate

The management of your product enables the respective IT managers, as well as users, to better interact with each other.

Cost Saving

Enable your customers to realize timely cost savings from administration and operations through simple management interfaces, Software As a Services, analytics and reporting, and high stability and flexibility of your product.

Security

The "Secure" is at the forefront for us. EgoMind generally pays attention to high security of features and functions in all areas of the 4 C's.

EGOMIND

Our 5 reasons to work together

Quick ROI

No HR concerns

Lower effort

High flexibility

Common factors for success

We are looking forward to a successful cooperation
