SOFTWARE DEVELOPMENT AS A SERVICE

YOU HAVE A NEW PRODUCT IDEA OR AN IMPORTANT PRODUCT ENHANCEMENT BUT NO TIME OR TEAM TO REALIZE IT PERFECTLY?

Software Development as a Service (SDaaS) takes care of everything related to product development. Don't worry about UI designers, architects, developers, quality managers, technical writers, etc.

You take care of your customers and your core competencies, we take care of the software development for you.

WE OFFER ADDED VALUE THROUGH EXPERIENCE!

Your customers benefit from **user-friendly software** in all components. We pay attention to a **stable** and effective architecture for computer applications and apps during development.

The **core components** of the software design are **always maintained** - they can be **adapted at any time** with the changing requirements. Through **qualitative** system architecture in **cloud** and **on-premise environments**, we always pay attention to **cost efficiency**.

EGOMIND

WE OFFER SOME DIFFERENT COOPERATION MODELS

SALES AND MARKETING
is the part of the partner, because the product was developed especially for this sales organization

IDEA
must be generated by the sales organization. Because you know, which product the customers needs and which product the organization could sell best

R&D
is always covered by Egomind. We take care of all steps starting by the concept until QA, Of course we do it in regulary Communication and Coordination

FUNDING
all products need a solid funding but much less then standard development cost due to many ready product parts

CONCEPT
is based on the idea. We develop an innovative and suitable concept for the market

SDAAS
We will realize your software dream for you.

SDAAS CO FUNDING
We will realize and co -finance your software project.

OEM
We develop a market-ready product for your sales team, even possible as white labeled product.
